

Yellowstone Valley Electric Cooperative Inc.  
Policy Bulletin No. 5C Attachment E  
**WIND POWER PURCHASE AGREEMENT**

NAME: \_\_\_\_\_

ACCOUNT NUMBER: \_\_\_\_\_

ADDRESS: \_\_\_\_\_

PHONE: \_\_\_\_\_

**Information:**

Yellowstone Valley Electric Cooperative is offering wind generated power to its residential and commercial customers. Wind power is being offered to YVEC by the Bonneville Power Administration. Because of the increased cost of wind generated power, YVEC will charge an extra two cents per kilowatt hour to cover this additional cost. YVEC customers will be able to purchase all or just a portion of their monthly electric needs in the form of wind power. YVEC will be offering blocks of wind power for purchase. Each block will consist of 100 kilowatt-hours. A minimum of two blocks, or 200 kilowatt-hours, must be purchased per month to participate in the wind power program.

**Agreement:**

I agree to purchase wind generated power from Yellowstone Valley Electric Cooperative. I agree to pay a premium of an additional two cents per kilowatt-hour for that portion of my monthly usage that I want to be generated from wind energy. In the event the cost of wind generated power changes, I will be notified by mail to see if I want to continue to remain on the wind generation program. My purchase of wind generated power will automatically renew monthly unless I notify YVEC otherwise. I agree to give Yellowstone Valley Electric Cooperative 30 days written notice if I wish to change the amount I am purchasing or if I wish to discontinue purchasing a portion or all of my monthly power usage from wind generated power.

**Wind Power Purchase Options:**

- 1) I wish to purchase \_\_\_\_\_ blocks (a minimum of 2 blocks is required) of 100 kilowatt-hours (kWh) per month. Each 100 kWh block will result in an additional \$2 charge on my monthly electric utility statement.
- 2) I would like all of my electric utility needs to be met with the purchase of wind generated power. For billing purposes, my wind generated power purchase will be rounded down to the nearest 100 kWh block.
